#### Local access and toll free charges

Your MailBug must dial a local number to access your Email. Knowing the telephone number from which your MailBug will make this local call enables us to find the proper local access number for you to use. We maintain thousands of local access numbers all across the country. In the rare instance that there is no local access number, we can provide access through a toll free number for a small \$3.00 per month charge. Because there are so many local numbers available, this is generally not required. In the areas where no local access is available, toll free access allows your MailBug to connect to the Internet from anywhere in the U.S., including very rural locations, Alaska, and Hawaii. If a toll free charge applies to your area, we will contact you and confirm your approval before shipping your MailBug.
